EDUCATION

2026-2028
UNIVERSITY ST GALLEN HSG

- Executive MBA

2021-2023
ZHAW WINTERTHUR

- Master of Advanced Studies in Data Science

2012-2017
ETH ZURICH

- Master of Science in Mechanical Engineering (Focus Energy)
- GPA: 5.67 / 6.00

2005-2011
KANTONSSCHULE ALPENQUAI

- GPA: 5.86 / 6.00

SKILLS

- Investment Analysis & Financial Modelling
- Long-Term Energy Price Forecasting
- Portfolio Valuation & Risk Management
- Strategic Investment Decision Support
- Leadership & Stakeholder Engagement
- AI Integration & Data-Driven Decision Making
- Programming & Data Platforms (Python, SQL, Snowflake)

LANGUAGES

- English (Business Fluent)
- French (Fluent)
- German (Native)

PROFILE

I am driven by continuous improvement, guided by the motto "If you stop getting better, you stop being good." I combine analytical rigour and financial acumen with strategic thinking, perseverance and a strong sense of responsibility. Over the past three years at BKW, I have been closely involved in major investment decisions, providing critical insights through long-term energy price forecasts, business case evaluations and portfolio modelling. As a collaborative leader, I bring people together around a shared vision, challenge conventional thinking and strive to create sustainable long-term value. I am passionate about leveraging emerging technologies, particularly AI, to enhance decision-making and performance. Outside of work, I enjoy playing tennis, skiing and strategic board games.

WORK EXPERIENCE

BKW Energy [Group Markets & Regulation]
2023 - PRESENT

Head of Strategic Market Analysis

- Advise BKW's Executive Board on energy market developments, strategic investments and portfolio implications, supporting the BKW Solutions 2030 strategy.
- Responsible for long-term energy price and volatility forecasts through 2050, providing key inputs for major investment business cases, long-term PPA valuations and flexibility investments.
- Lead the development of BKW's portfolio analysis engine, enabling sophisticated portfolio modelling, scenario analysis and strategic investment decision support.
- Develop advanced market volatility forecasting models integrating geopolitical risks, conflict monitoring and weather-driven scenarios.
- Lead and mentor a high-performing analytics and IT infrastructure team, fostering collaboration, innovation and a results-driven culture.
- Drive the development of scalable analytics infrastructure, including REST APIs, interactive dashboards and web applications, to enhance data accessibility and decision-making.

BKW Energy [Trading]
2018 - 2023

Quantitative Analyst & Senior Analyst

- Developed fundamental, statistical and machine learning models to forecast European power, gas, coal and CO_2 prices and assess market risks.
- Built a European gas supply-demand model and LNG tracking algorithm to identify market trends and trading opportunities.
- Contributed to the development of an internal quantitative trading engine, translating market insights into trading signals.
- Automated market data acquisition and management using APIs, web scraping and databases.
